4331	**"ZANTE ERROR"** 1862/67: 10 l. orange-yellow on blued paper, used example with large margins all round lightly cancelled at Zante with lower part of Zakynthos datestamp '111' apparent, the datestamp leaving the variety "Inverted Control Figure 10 printed on the face of the stamp" remarkably clear. Reverse without the Control Figures, two tiny thin spots not detracting from the otherwise superb appearance. Just 15 examples (ref. Coundouros) recorded although we believe the figure to be nearer 20 known of which as many as 11 examples are cut into. All are in used condition. Revenue

4484	1831: 'Kapodistrias / Tessaracontalepton', the famous 40 lepta black typeset on thick laid paper, which some would argue (C. Nicolaides, C. J. Phillips (Managing Director of Stanley Gibbons), P. Korteweg, Dr. H. Munk, Pemberton, P. J. Drossos) was the first 'stamp' ever issued, a fine marginal example from base of sheet, with value "Lepta 40" impressed, the stamp measuring 36 x 27 mm. and believed to have been printed in Naphlion. However, more recent studies have shown that the 'stamp' was issued to receipt the sum of 40 lepta / 1 piastre, donated by each individual Greek citizen to help defray the Government costs of land grants to thousands of homeless refugees arriving from Crete after the Independence War (1821-28). John Antonios Capodistrias was the President of Greece at the time of the 'stamp's' issue and it was he who instigated the plan for the refugee's resettlement even though there was no Government money available - hence the donation / tax required from each individual. When this amount was paid, the receipt was made with this 'Lepta 40' stamp, the print of which is in the same font as that used by the Greek Government Gazette of the time. Despite the fact that the 'stamp' is now known never to have been used genuinely on a letter and that it is, in fact, a revenue stamp, they are still undoubtedly rare and this is a particularly fine example. *(Photo = 267)*		(*)	**500**	*(€ 445)*

To have a better chance of being successful as a postal bidder we recommend setting a limit for the total amount of your purchases (excl. 20% buyers premium): for example, bidding on a range of lots with a total amount of CHF 10'000 and setting a limit of CHF 7'500 for your purchases means that the total for lots knocked down to you will not exceed the limit you have set. We know from experience that postal bidders are rarely successful on all lots. On the other hand, you might have been interested in other lots as well, but not knowing which lots would be knocked down to you and being worried to spend more than a certain amount, you did not bid on them. Giving a total purchase limit (see also the Bid Form in this catalogue) enables you to have a better chance of being a more successful postal bidder!
