4778	1858: 2 Kr. gelb Type II mit vorderseitigem **Doppeldruck**, letzterer im **farblosen Blinddruck einer 5 Kreuzer - Marke**, dieser etwas nach rechts verschoben, vollzähnig, farb- und prägefrisch, kräftig entw. "OFEN 14/12". Attest Ferchenbauer (2017) Ferchenbauer = RRR. Dr. Ferchenbauer beschreibt dieses Stück und seinen Fund detailliert in seinem Artikel in der BRIEFMARKE (Juni 2016, in Kopie anbei) und führt in seinem Attest aus: "Bei diesem Stück handelt es sich um die zweite bisher aufgefundene 2 Kreuzer-Marke mit einem vorderseitigen Doppeldruck, letzterer etwas nach unten rechts verschobener Blinddruck mit deutlichen Konturen einer Wertprägung '5 KR'. Das ... erste bekannt gewordene Stück dieser extrem seltenen Abart ... ist seit längerer Zeit bekannt gewesen ... Bei beiden Marken findet man übereinstimmend eine minimale, jedoch nicht übersehbare bräunlichrote Farbbeimengung, weshalb durch diese sensationelle Übereinstimmung ein schlüssiger Beweis für die Echtheit der Stücke erbracht ist.". Diese Abart ist vielleicht nicht so offensichtlich wie der Farbfehldruck 3 Kr. rot der 1867er Ausgabe, von dem immerhin sechs Stück bekannt sind, aber das vorliegende Stück ist eine sensationelle Rarität der Ausgabe 1858.	10/IIa var	**20'000**	*(€ 17'800)*

Austrian Levant - Disinfected Mail

Corinphila are proud to present this Exhibit, suitably lotted, showing the development of Disinfection in the Austrian Empire through it's handstruck cachets and wax seals. Many of the letters here are disinfected due to the 1816-1851 Cholera Pandemic. The speed and scale of the spread of this disease was, by any standards, catastrophic. For example, over 250'000 people were infected of which an estimated 100'000 died in Russia alone between 1829 and 1831. Western Europe was not exempt either: with 20'000 lives lost in Paris and over 6'500 in London from this epidemic in 1831. Philatelic references throughout are from the owner's research, 'Pratique' the Journal of the Disinfected Mail Study Circle edited by V. Dennis Vandervelde and 'Disinfected Mail' by Dr. K. F. Meyer (1962)

The Ghica Palace in Colentina, Bucharest in 1859

The Ghica family was a noble family active in Wallachia, Moldovia and in the United Kingdom of Romania, between the 17th and 19th centuries. The Ghicas also held the (agnatic) rank of Princes of the Holy Roman Empire (german: Fürst). Among the many high ranking politicians and persons of culture, members of the Ghica family were:

- *nine 'Princes of Wallachia' between 1659 and 1842*
- *five ' Princes of Moldovia' between 1658 and 1856*
- *and two 'Prime Ministers of Romania' between 1866 and 1870.*

According to Fritz Heimbüchler certificate (Sept. 2017) this entire is one of the finest existing covers bearing the 54 parale and the only addressed to a Romanian Noble family recorded to date!

To have a better chance of being successful as a postal bidder we recommend setting a limit for the total amount of your purchases (excl. 20% buyers premium): for example, bidding on a range of lots with a total amount of CHF 10'000 and setting a limit of CHF 7'500 for your purchases means that the total for lots knocked down to you will not exceed the limit you have set. We know from experience that postal bidders are rarely successful on all lots. On the other hand, you might have been interested in other lots as well, but not knowing which lots would be knocked down to you and being worried to spend more than a certain amount, you did not bid on them. Giving a total purchase limit (see also the Bid Form in this catalogue) enables you to have a better chance of being a more successful postal bidder!
